GROUP 3300

Sir:

This is in response to the Office Action mailed on February 13, 1997. Please amend the above-identified application as follows:

IN THE CLAIMS

Please rewrite the following claim as indicated:

- 1. (Twice Amended) A nasal dilator for preventing outer wall tissue of nasal passages of a nose from drawing in during breathing, comprising:
 - a flexible, unitary truss member having [a normally, substantially planar] an initial state absent flexure thereof, the unitary truss member including:
 - a first end region adapted to engage the outer wall tissue of a first nasal passage;
 - a second end region adapted to engage the outer wall tissue of a second nasal passage;
 - an intermediate segment configured to traverse a portion of a nose located between the first and second nasal passages, the inherent tendency of the truss member to return to its [normally planar] initial state
